

the nets are spread -- a place where there are a few huts -- a place where there are a few ~~huts~~ Bungalows, a seashore resort for hermits, but otherwise Tyre has been nothing all those years. But up till the days of Alexander from Nebuchadnezzar to Alexander there are several periods when Tyre's history is not known. So there are several places where the 70 years of Tyre's being forgotten would fit in -- several places. But it is hard to know where there is any place that her goods being used to sustain the Lord's people could fit in -- hard to know of any place. \_\_\_\_\_  
\_\_\_\_\_ as I said yesterday, you hate to qualify it all the time. There's lot's we don't know. But there is hardly any place where you can see her goods being used for the Lord's people. Therefore, on the strength of that most prophecy scholars ~~have~~ have looked at it and said, Well, it rather has to be future. And so then again we have said, Well, why is Tyre -- the same problem with Tyre as we mentioned yesterday with Assyria. Why is Tyre mentioned by name? And several members of our class mentioned that it might be the name of the place, it might ~~be~~ get its name from the local. It might be that it happens to be a name given then rather than calling it whatever it is called today. It might be any one of those particular ~~circumstances~~ circumstances. But this along with the Egyptian prophecy is what I call a pretty clear cut example of prediction unfulfilled. Now, we said yesterday, if some of us are prone to drop them all into the Kingdom Age, where we may drop some of them after a bit, but Tyre as far as a political force is concerned has been nothing since the days of Alexander. And it does not look like it is about to make a speedy recovery in the next few years although <sup>you</sup> ~~we~~ really don't know about that. Now, the giant capital of Brazil, that ~~beautiful~~ beautiful city -- I've never been there, but I have seen the pictures. My brother in law brought back 300 slides of Brazil. He was a missionary in Brazil. He brought back at least 300 slides of Brazil -- each slightly worse than the first. (Laughter) So I sat -- that's the way most missionary slides are. When you see the first one, that is the best you will ever see. You ~~had~~ better stop then unless they are professionally made. But, whatever the case is, that's my comment. I had better leave that one go and come back on peaceful ground. But you see, 20 years ago -- Now, you will have to ask one of our Brazillian students if the time is right -- but within the span of the last quarter century, there was nothing there but jungle and mush -- nothing. And the Brazillian government decided to create a captial there, and in just two decades they have built a ~~giant~~ giant ~~city~~ city with great buildings, and not many slums because there aren't a ~~lot~~
